***Examination of Application #09/814,536***

1. Claims 1-26 of application 09/814,536, filed on 21-March-2001, are presented for examination. This application is a Continuation of PCT/US00/10373, filed on 14-April-2000.

***Claim Rejections under 35 U.S.C. § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 2.1 Claim 19 is rejected under 35 U.S.C. 102(b) as being anticipated by the article authored by Malkamaki et al., hereinafter Malkamaki, entitled *A Method for Combining Radio Link Simulations and System Simulations for a Slow Frequency Hopped Cellular System*, 1994 IEEE 44<sup>th</sup> Vehicular Technology Conference, pages 1145-1149.

- 2.2 Malkamaki disclosed the invention as claimed, including a two step look-up table approach for combining radio link simulations with system simulations [p. 1147, col. 2], wherein burst quality look-up tables (*applicant's first interface portion*), which model the burst quality [p. 1148, col. 1], are used to generate burst quality values; and wherein, several burst quality values are combined, and used as inputs (*applicant's inheriting of a condition generated by a preceding simulation*) to the block level look-up table [p. 1148, col. 2] (*applicant's second interface portion*), which are then used to form block quality values [p.1147, col. 2].
